

PRODUCT / PROCESS CHANGE NOTIFICATION

Notification Date: 08/12/08

Projected Completion Date: 08/12/08

PCN Number : 10147

Product Identification (Including Customer P/N):

MCO Series CMOS Clock Oscillators

Detailed Description of Changes:

The MCO series is being discontinued as a standard oscillator family.

Reason for Changes:

This product family uses old metal-gate CMOS technology. It is becoming increasingly difficult to deal with supply chain issues for obtaining some of the semiconductor dice used in this product family. For 5 V applications, the MHO+ series is a newer alternative that offers better performance.

Projected Timing of Change and Implementation Date:

Effective immediately, new orders for MCO series oscillators will not be accepted.

Anticipated Impact on Quality and Reliability:

The MHO+ uses a newer technology (High Speed CMOS) which is less expensive and more readily available than the older metal-gate CMOS technology. Performance of the MHO+ is better than that of the MCO for 5 V applications. (No alternative is offered for higher supply voltage applications.)

Qualification Plan (if applicable):

N / A - M-tron has had the MHO+ series as an active and preferred product offering for a number of years.

Last Time Buy Date:

N / A

Last Time Delivery Date and Comments (if applicable):

N / A
