

# Introducing The New Mtronpti.com

Your Destination for RF Components and Solutions

September 7, 2021 – MtronPTI, a leading provider of Filters, Oscillators, Resonators and Microwave Assemblies, is excited to announce the launching of our brand-new website. Created with the user experience in mind, the site includes many new features to help users quickly and easily navigate the site and find the products, solutions and technical information they need. The new website has been designed to offer the ultimate user-friendly experience with improved navigation and functionality while allowing customers to see MtronPTI's extensive product portfolio.

With a new, graphical, modern design the website focuses on user-friendly searches on markets, applications and related products and solutions. Our innovative FastFinder utilizes one-click technology to quickly find products. Technical data is organized in an easy-to-find structure and includes short form catalogs, data sheets, technical data, certifications, block diagrams and reference designs. Numerous 'self-help' interfaces walk the user thru locating representatives and distributors, product life cycle, product change notices, trouble shooting, contacting us and requesting samples.

## **New features include:**

**FastFinders** – One-click parametric search engines allow rapid locating of products and solutions.

**Expeditious Exporting** – One-click downloading, printing or copying of searched data.

**Numerous Hyperlinks** – Mouse over virtually any text for a one-click deep dive into more information.

**Market and Application Focus** – The demands of each market and application are seamlessly linked to applicable products and solutions to solve their respective requirements.

**Product and Solution Focus** – Products and Solutions are organized by function, then technology, such that numerous technology solutions appear in the same parametric search.

MtronPTI – your one-stop shop for all your stock and custom RF component and solution needs.
